3-month warranty against the manufacture defects

Cleaning & Maintenance

Flush with clean water and dry with a soft cloth to prevent water spots and mineral deposits

Clean with a soft (non-abrasive) organic liquid such as a low PH vinegar and water mixture or transparent glass detergent to remove mineral deposits.

Refrain from using cleaning products that contain chlorine bleach, abrasives, silver, sulfur or acids as they strip the finish.

To remove lime buildup from jets, pour a half and half solution of vinegar and water into the unit and press jets lightly to break down areas of heavy concentration. Flush with clean water.
